

**Problem**

The iPad displays a message saying that iCloud storage is reaching 5GB.

**Possible Solution**

iCloud provides 5GB of storage free of charge. When this space is close to being used, Apple will notify you and ask if you wish to upgrade (at a cost).

You can examine what devices are backing up to this iCloud account (using a single AppleID) and manage which apps have content backed up by clicking on the link below and following the instructions.

<http://support.apple.com/kb/ht4859>

Please be aware that movies created in iMovie or stored in the Camera Roll can be large and take up a lot of space in the iCloud backup.
